Subject: Hot Site Report - Dimock GW Site - Update #2

Residential well survey results to-date: The 19 wells included in the Consent Order between PADEP and Cabot were prioritized for the survey. 12 of these 19 wells have been surveyed. None are reported to be drinking raw well water. There is a combination of bottled water, water buffaloes and treatment systems in use. 2 additional surveys are scheduled for this evening. Survey teams have been unable to contact 3 residents so far.

4 other wells in the immediate neighborhood of the original 19 have also been surveyed. None are reported to be drinking raw well water, but are drinking bottled water provided by Cabot.

Well surveys will continue thru this week and updated results will be provided as they are collected and summarized.
